By Henry Alleyne Nicholson

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1889 Excerpt: .of this vault correspond to the oral plates of the Neocrinoids. One of these is larger than the rest, and immediately behind it the vault is perforated by a single, excentric, or, rarely, central aperture, which is often prolonged into a tubular proboscis, and which is to be regarded as the anus. In all such cases, the ambulacral grooves are continued beneath the above-mentioned canopy, from the bases of the arms, across the ventral aspect calyx, as so many tunnels. During life these lodged both the I grooves and the water-vessels beneath them, and there is aid that the latter opened into a circular vessel surrounding the and representing the circular ambulacral vessel of the Echino generally. Hence in specimens of such forms, where the armsl been detached (figs. 294-296), the upper side of the calyx is i to be covered with a plated dome, and...
