General works for reading and reference. The name of this volume suggests its purpose Botany in the past has often meant much highly technical study of floral structure or internal anatomy of plants but very little of human interest. The authors hope by means of this book to supplement the usual text books of the science which must of necessity be concerned chiefly with fundamental conceptions of morphology and physiology. The aim is to supply a fund of information that shall be of value to college students high school teachers and the interested public. The material herein (about half of which is adapted from Robbins Botany of crop plants) has been used by the authors for a number of years in a brief one term course for college students. It furnishes a background of knowledge of the world's commercial plant products both for students of botany and for those whose interests are in the fields of geography economics and agriculture. Illustrative laboratory work is easily arranged and has been found to be unusual interest to students. The book includes a discussion of...
