Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The American Journal of Science, Vol. 24 of 124: July to December, 1882 Art. I. - Contributions to Meteorology; being results derived from an examination of the observations of the United States Signal Service, and from other sources; by Elias Loomis, Professor of Natural Philosophy in Yale College. Seventeenth paper. With three plates. [Read before the National Academy of Sciences, Washington, April 18, 1882.] Relation of rain areas to areas of low pressure. In my seventh paper, I examined all those cases in which the total rain-fall at all the stations of the United States Signal Service amounted to at least eight inches in eight hours, during a period of fifteen months. As the tri-daily observations have since that time been published for twenty-two additional months (viz: from Dec. 1873, to Jan. 1875, inclusive, and from Jan. 1877, to Aug. 1877) I propose to extend the examination to these later observations. The following table exhibits all the cases from Dec. 1873, to Jan. 1875, in which the total rain-fall at all the stations amounted to at least nine inches in eight hours; also all the cases from Jan., 1877, to June, 1877, in which the total rain-fall amounted to at least ten inches in eight hours; and for July and August, 1877, amounted to eleven inches in eight hours. This change in the amount of rain-fall adopted as the standard, was rendered necessary by the gradually increased number of the stations of observation. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology...
